

AAPM | RSNA IMAGING PHYSICS RESIDENCY GRANT

The purpose of the AAPM funding is to provide 50% support of a resident's salary for two imaging physics residency programs for two years. The awardee institution(s) will provide the other 50% support. After the period of the award is over, the intent is that the awardee institution(s) will continue to fully support this new imaging physics residency position. Demonstration of this intent should be included in the application materials. This funding support will begin in July 2025.

AAPM and RSNA provide matched funding to support these grants. Two programs are selected. Each institution receives \$35,000 for two years as matching support for one resident.

Sponsored by the AAPM Education and Research Fund.
